# USB Bluetooth™ Adaptor

**Description**

The Brain Boxes USB Adaptor allows a personal computer with a USB port to communicate with other Bluetooth devices. It is based on the Cambridge Silicon Radio BC02 chip. The antenna for the board is built into the PCB.

This product is part of a wide range of Bluetooth products available from Brain Boxes including Type I Compact Flash, RS232 and Type II PCMCIA.

**Software**

This product is available with Brain Boxes drivers and Bluetooth software stack for Windows 2000, Windows Millennium, Windows 98SE. For more details on Brain Boxes Bluetooth software stack see [www.brainboxes.com/bluetooth](http://www.brainboxes.com/bluetooth).

Alternatively the Brain Boxes product can be used with a Bluetooth software stack from any third party vendor.

As a result of our partnership program, Brain Boxes products are arguably supported by the widest range of third party stack vendors.
